

# bets como jogar

The sum of odd numbers formula is  $S_n = n/2 [a + l]$  where  $a$  is the first term and  $l$  is the last term. In this case,  $a = 1$  and  $l = n$ . So the formula becomes  $S_n = n/2 [1 + n]$ .

Another formula to calculate it is  $S_n = n^2$ .
