Why Choose Paragon for Concrete Poker Hire?
At Paragon Tool Hire, we understand the significance of proper concrete compaction for achieving long-lasting and durable structures. Our range of vibrating concrete pokers includes:
- Vibrating Poker Unit (Petrol) c/w 1" or 2" Poker: This Vibrating Poker Unit is powered by a reliable petrol engine, providing portability and versatility on the job site. Choose between the 1" or 2" poker options based on your project requirements. This poker unit is ideal for effectively compacting concrete in various applications, ensuring enhanced strength and stability.
- Belle Electric Poker Unit and Shaft: The Belle Electric concrete poker offers efficient and reliable compaction using electricity as the power source. This option is perfect for indoor or noise-sensitive environments where petrol-powered units might not be suitable. The electric vibrating poker, combined with a sturdy shaft, ensures consistent compaction for your concrete pours.
Our concrete poker units are sourced from trusted brands, such as Dynapac and Belle, and undergo regular checks to ensure they're in prime condition. When you rely on our poker units for your concrete projects, you're guaranteed quality and safety.

Need Assistance in Choosing the Right Vibrating Concrete Poker? We're Here to Help!
If you're unsure about which concrete poker is best suited to your project, get in touch today. Call our friendly advisors on 01280822282, and let us guide you in making the right choice for your concrete compaction requirements. At Paragon Tool Hire, we are always happy to help.
