

pix bet bolao

The negative number shows how much has to be risked to win a \$100 payout. Thus, if the one line for the team that you picked was -400, it means that if you placed a bet of \$400, you would win \$100. If the odds are -110, a common number for a bet involving a spread, you would need to bet \$110 to win \$100. Ads?
